BUILDING

At number 30 Gran Vía Street, a sumptuous building was erected in 1924 by Teodoro Anasagasti and his father-in-law José López Sallaberry, also the architects of the well-known Paris-Madrid building, which still today harmoniously combines the classical with the contemporary.

The building belongs to the second section of Madrid's Gran Vía, then called Bulevar Pi y Maragall. It is a group of three united buildings, a symbol of the culture and power of the time.

It stands out for its large dark blue window and its triple arched entrance at street level.

VENUE

Bulevar30 is located on Madrid's main thoroughfare, at ground level: an open-plan, multidisciplinary event space open to anyone who wants to enjoy an exclusive and distinctive atmosphere.

From the thirteenth floor, the glass window that envelops a space of 150 square meters offers a panoramic view of the capital without architectural barriers.

US

We organize all types of events and corporate actions, adapting the space to the needs and desires of our clients' proposals.

We offer premium advice, including comprehensive support throughout the development and execution of the same.

ARCHITECTURE

Bulevar30 presents a 150 square meter floor plan basing its contemporary lines on the High-Tech architectural movement, a style that predominated in the 1970s.

The windows and views are a clear example of the movement that revolutionized the construction of buildings, revitalizing space through industrial materials.

Its thirteen stories high offer the viewer 360-degree views of Madrid's main artery: the Gran Vía.
